

## Coarse Hominy

Standard coarse grade hominy contains the bran, tip caps, germ and tailing streams from maize kernel in a blend of coarse, medium and fine grind material.

The meal will be free of any noxious materials and contamination of foreign seeds, insects or vermin and through the absence of fault, shall be generally suitable for use in stock-feeds and formulated feeds. Being an excellent source of soluble carbohydrate and fibre, hominy is utilised in a range of animal feeds and formulated foods. Hominy aids palatability, has good hydration properties and is a good carbohydrate source of energy. It can also contribute significant amounts of calcium, iron, riboflavin and thiamine to diets.

### GMO Free

No maize products produced by Corson are derived from genetically engineered or genetically modified maize crops. The grain used is grown from hybrid maize seed developed using traditional plant breeding techniques. New Zealand and Australian law prohibits the production of GMO maize.

### Food Safety Compliance

Corson operations are carried out under a Food Control Plan which has HACCP and GMP as central to functioning of the programme. Corson complies with all sections of Food Standards Australia New Zealand.

### Specifications

Moisture	14 – 19 %
Oil	7.5 % max
Crude Fibre	4 – 7 %
Bulk Density	Typically 465 g/l uncompact: approx. 590 g/l compacted
Shelf Life	4 – 6 weeks maximum when stored in a cool and dry area, free of insects.

### Typical Granulation Profile

Sieve Size	Range %
1.4 mm	20 – 30
1.18 mm	3 – 15
1.0 mm	3 – 15
710 µm	5 – 20
500 µm	5 – 17
250 µm	8 – 20
< 250 µm	13 – 25

### Nutritional Information

### Average Quantity per 100g

Energy	11.5-12.5 Me MJ/kg (for ruminant diets)
Protein	9.75 - 10.75 %
Water	6.5 % max
Fat	6.5 % max
Fibre	4.5 - 6.0 %
Potassium	0.67 %
Ash	2.84 %
Salt	0.08 %
Calcium	0.05 %
Phosphorus	0.2 %

### Packaging Options

#### New Zealand

#### Australia

25 kg Polypropylene bags

Bulk truck / trailer units

900 kg Bulk bags
